

## THE BIRDS OF JATUN SACHA BIOLOGICAL STATION

Napo Province, Ecuador  
An Inventory, Compiled by:

Bonnie Bochan  
P.O. Box 306  
Winterport, Maine 04496 USA

REVISED LIST: January, 2008

The following checklist includes the species of birds observed or heard at Jatun Sacha over more than twenty years from January 1987 through January 2008. The area covered includes all habitats within the north and south sectors of the reserve from the Río Napo to the Río Arajuno, east to Aliñahui and west to the Chichicorrumi area. Taxonomic order and nomenclature follow **The Birds of Ecuador** (Ridgely & Greenfield, 2001). Spanish common names are from **An annotated List of the Birds of Mainland Ecuador** (Ridgely, Greenfield and Guerrero 1998). To date, a total of 563 species have been recorded. The compiler is preparing a monograph **The Birds of Jatun Sacha Biological Station**, with information on abundance, status, habitat preference, habits, seasonality in movement and vocalization, migration and breeding patterns as well as historical data and interviews. Species noted with an asterisk (\*) are very rare or have no recent observations. Species in parenthesis indicate hypothetical status warranting further documentation. Please report any additional species or observations to Bonnie Bochan, Jatun Sacha Biological Station Casilla 515-01-218 Tena, Ecuador or Jatun Sacha Biological Station, Casilla 17-12-867, Quito, Ecuador.
